Personal Interests	<p>I am very enquiring and like to get to the details and background of things. I enjoy reading books and magazines, browsing the internet or visiting museums. My interests range from design, photography and graphic art through music, youth culture, and sports to cognitive psychology, high-tech science and foreign cultures.</p> <p>In my free time and holidays I like to be outdoors and travel. It doesn't matter if its cycling, trekking, climbing or snowboard touring. I often have my camera with me on my travels as this has been a passion of mine for a long time.</p>
